

Don't Put Off Until Tomorrow What You Can Do Today

Avi Sharabi 416-596-2891 asharabi@blaney.com

OVERVIEW

Why Investigate Early?

Early Investigation Strategies (A Non-Exhaustive List)

Takeaways

THE BENEFITS: Formulating a Plan

- Avoid surprises:
 - Identify the strengths and weaknesses of your case early to gain a strategic advantage

Forward thinking:

 Build a (malleable) theory of your case early to inform resolution strategies

THE BENEFITS: Informing the Pleading

- The purposes of pleadings¹:
 - Define the question in controversy between litigants
 - Give fair notice of the case which is required to be met and the remedies sought
 - Assist the court in determining the issues
- Pleadings should contain allegations of material fact, and disclose a reasonable cause of action²
- Early investigation can make the "facts" section of a pleading more persuasive, and serve as a roadmap going forward

- 1. Clarke v. Yorkton Securities Inc., 2003 CanLII 35578 (ON SC)
- 2. See generally Rules 21 and 25 of Ontario's Rules of Civil Procedure

Blaney MCMurtry A Professional Liability Claim

A professional is sued. They tender a claim to their E&O insurer. There is a defence obligation. The claims examiner only has the statement of claim and the policy. The insurer retains defence counsel. How can defence counsel investigate this claim at an early stage?

Blaney EARLY INVESTIGATION MCMurtry STRATEGY: The Insured

- Speak with the insured in order to obtain their point of view
- Obtain their file to look for objective evidence that would tend to either support the insured's perspective or that the other side(s) may use to make their case
- Explain the concept of relevance to the insured

 Is there a property involved (i.e. mortgage broker claim, construction E&O)?

Blaney EARLY INVESTIGATION MCMurtry STRATEGY: Land Titles Search

- Relatively inexpensive
- Reveals legal owner of the property
- Identifies other potential claimants (i.e. mortgagee)
- Useful if fraud is an issue
- Also useful in other contexts: i.e. property damage coverage, judgment execution, etc.

 Is there a corporation(s) involved (i.e. company co-defendant(s), corporate plaintiff(s))?

EARLY INVESTIGATION STRATEGY: Corporate Searches

- Relatively inexpensive
- Reveals key D's & O's could reveal potential witnesses or key players
- Indicates if corporation still active
- Also useful in other contexts: i.e.
 D&O coverage matters, third party claims, etc.

Blaney MCMurtry STRATEGY: The Professional(s)

- Professionals are usually regulated: FSCO mortgage brokers; RECO – real estate salespersons/brokers; LSUC – lawyers
 - RIBO insurance brokers; MFDA mutual fund dealers; Etc.
- Look up professional standing for free
- Disciplinary rulings
 - should not be binding on civil action³
 - relevance and weight are always factors
 - optics, optics, optics!

- Some Basic Premises⁴:
 - Experts are needed to prove technical issues, such as professional negligence (in most contexts), and certain kinds of damages, as well as other issues (i.e. patents)
 - their duty is to the court
 - they must remain unbiased and impartial
 - defence counsel cannot compromise the expert's objectivity
 - consultation and collaboration are allowed in principle (but be careful not to inappropriately influence the expert!)
- However: biases are inherent in the litigation process

4. See *Moore v. Getahun*, 2015 ONCA 55 (CanLII) w.r.t. Ontario, and *White Burgess Langille Inman v. Abbott and Haliburton Co.*, 2015 SCC 23 (CanLII) w.r.t. Federal Court.

- Examples of Biases⁵
 - Selection bias choosing the "usual suspects"
 - Affiliation bias i.e. "Stockholm syndrome"
 - Compensation bias a more favourable opinion is worth more
 - Hindsight bias "Overconfidence is fed by the illusory certainty of hindsight."⁶
- Will retaining an expert early on, and picking their brain improperly bias them, if you plan to ask them to give an opinion at trial? Do we need to "blind" them to certain information?

5. C Robertson and A Kesselheim, *Blinding as a Solution to Bias*, 1st ed (Arizona: Academic Press, 2016)

6. D Kahneman, *Thinking Fast and Slow* (Toronto: Anchor Canada, 2013)

- The answer: it should depend on the logic upon which the opinion is founded
- "I am mainly interested in the substance of an expert's opinion and the reasoning that led to that opinion. If it is well-reasoned, there may be no reason for concern about whether the witness was blinded to certain facts when giving the opinion. A concern may arise where the expert's opinion seems tortured or less well-reasoned."⁷

7. Shire Canada Inc. v. Apotex Inc., 2016 FC 382 (CanLII), Locke J.

- How can we utilize an expert at the investigation stage, without causing undue bias?
 - Do not ask them conclusory questions on liability
 - i.e. ask them to identify what key facts they would need to both prove liability or disprove it. That way, you know what both sides should be looking for
 - Make use of the expert as a learning tool, not as a source of opinion evidence
 - i.e. in the damages context, such as where business or stock/bond valuations are at issue (or other technical issues are at play), find out what approach is used in that field to value the business, stock, bond, etc.

EARLY INVESTIGATION STRATEGY: Social Media

- Facebook, Twitter, Instagram, etc.
 - Two key considerations of a court:⁸
 - Relevance to the matters at issue
 - Whether disclosure breaches the party's privacy

i.e. Plaintiff resisted disclosure of private part of Facebook account. Public part contained relevant information. Reasonable to infer that private part also contained relevant information. Privacy concerns alleviated since plaintiff shared private information with 200 other people (only 5 of whom were close friends).

8. Frangione v. Vandongen et al., 2010 ONSC 2823 (CanLII)

INCLUSION EARLY INVESTIGATION UNITARY STRATEGY: Wearable Technology?

- Wearable technology (i.e. smart watches, Fitbits, etc.) can measure:
 - Heart rate
 - Quality of sleep
 - Number of steps climbed
 - Number of steps walked
 - Etc.

Find the FITBI tracker for you	zip	one	flex	olta	chargeHR	blaze	surge

EARLY INVESTIGATION Tey Jrtry STRATEGY: Wearable Technology?

- U.S. defence counsel are beginning to request this information as part of their discovery process
- How might a court in Canada view such evidence?
 - Relevance: arguably similar to social media
 - Privacy: not something usually shared with "social media friends", unless the user posts their results on social media, but what about the meta-data?
 - Also, unlike social media, the following issues apply:
 - Reliability of the technology⁹
 - Chain of custody/preservation of evidence

9. Class action lawsuit filed against Fitbit, Inc. in Federal Court (San Francisco) alleging Fitbits are unreliable at measuring heart rates. A new study commissioned by class counsel agrees with this contention.

Blaney MCMurtry

- Early review of the insured's file
 - Assess exposure
 - Review privilege
- What if the insured's file is fairly large?
 - E-Discovery?
 - Cost/benefit analysis

EARLY INVESTIGATION STRATEGY: Predictive Coding Software

- Problem: traditional e-discovery technology utilizes Boolean logic (i.e. "stock" /p "option")
- What about Predictive Coding?¹⁰
 - Useful for massive sets of documents
 - Lawyers "train" the software by culling a sub-set of documents and earmarking it for relevance, privilege etc. Software "learns" from this sub-set and applies algorithm to remaining documents

 Courts in both the United States and Canada have acknowledged this method of e-discovery. See *Moore v. Publicis Groupe*, 287 F.R.D. 182, 193 (S.D.N.Y. 2012) aff'd 2012 WL1446534 (S.D.N.Y. Apr. 26, 2012); *Bennett v. Bennett*, 2016 ONSC 503 (CanLII)

EARLY INVESTIGATION STRATEGY: Predictive Coding Software

- Pros: identify more relevant documents than traditional software; (in theory) eliminate inconsistent production; and reduce the risk of being accused of leaving out relevant documents (blame the software!)
- Cons: usually need approval from the opposing party(ies), which may result in opposing counsel wanting to be actively involved in developing the algorithm and opposing counsel may gain access to irrelevant but potentially damaging documentation; not always reliable at sorting out privilege

TAKEAWAYS:

- Start building your theory of the case early
- Think of the insured as a source of information
- Obtain relatively inexpensive registry searches to verify property and/or corporate information
- Obtain FREE regulatory information, where applicable

TAKEAWAYS:

- Seek professional help
- Be mindful of relevance
- Be wary of privacy concerns
- Be on the lookout for new technology
- Never be beholden to your theory keep evaluating the insured's exposure objectively
